

Health Risk Problem

Occupational Health Risks from Occupational Asthma, Dermatitis and other body hazards through the handling of Substances Hazardous to Health within Spraying Operations.

Solution

In conjunction with its workforce, Mivan has developed a COSHH Risk Assessment Summary Sheet. This details elements of the COSHH Risk Assessment and acts as a quick reference guide for the user and Area Supervisor.

Copies of the original Material Safety Data Sheets (MSDS) and COSHH Risk Assessments are retained for further reference within each work area.
